

## Testimonials

“I have attended the entire suite of Doug's high frequency measurement classes and highly recommend them to anyone involved in troubleshooting signal integrity and EMC issues. There isn't a wasted minute in class. Each concept Doug teaches you can be put to use immediately. No fancy math needed...just down to earth, practical, hands-on approaches to solving problems. Doug classes are truly one-of-a-kind.” *May 15, 2009*

**Top qualities:** Great Results , Personable , Expert

Attended High Frequency Measurement Techniques in 2007

“Doug is a wealth of information and very generous with his knowledge. His seminars are excellent, very engaging and relevant - great connection to the audience. Over the years I have asked for his help with various problems and have really appreciated his help.” *July 25, 2008*

[James Dull](#) , *Technician , Static Tek Inc*

“Doug is one of the most talented engineers that I have had the pleasure to work with over many years. His engineering knowledge is extremely broad and surprisingly deep. Most engineers know a little about a number of subject areas. Doug on the other hand has the depth on almost any subject matter. Aside from being technically brilliant, Doug is also wonderful to work with. He was well liked by his team as well as others in the larger organization. With some luck, I will have the opportunity to work with Doug again.” *February 9, 2009*
